

# China Center China Bridge Challenge

Strategies for an Evolving U.S.-China  
Relationship: Resiliency in the Face of  
Climate Change

UNIVERSITY  
OF MINNESOTA  
Driven to Discover<sup>SM</sup>

## Title of Your Topic

Names and affiliations of team members

Name and affiliation of the coach

## Justification of Topic Relevance

Define the scope of your topic and justify its relevance and importance to U.S.-China relations.

## Challenge and Solution

Identify a common challenge faced by the U.S. and China

What is the common challenge and why? Describe the magnitude of the challenge.

Proposed a solution to the identified challenge

Propose a concrete plan. You are encouraged to utilize design thinking and processes to address why and how the U.S. and China should partner to solve the identified challenge.

## Justification of Feasibility

Justify the feasibility of implementing the proposed solution with resources that are likely available to the UMN community and within a reasonable timeframe. What roadblocks might your solution run into and how to clear those obstacles?

## Impact

What kind of social, political, or economic impact will your solution lead to? What demographic groups will benefit from the proposed solution? Will your solution result in long-term or short-term impact?

## References

Provide a list of references in the APA or Chicago style.
